

Schoedinger Cremation **COMMITMENT TO CARE**

4 Step Identification

We have a unique process for identifying those entrusted to our care. First, we immediately place a personal identification bracelet on your loved one that is scanned and electronically recorded into our proprietary system. Second, your loved one is fingerprinted, recorded into our system, and all personal property inventoried. Third, your loved one is given a unique identification number. This number is used throughout the cremation process, and a stainless steel tag with this number accompanies your loved one during the cremation process. Fourth, we have multiple assurance points where manual processes are electronically verified by our proprietary system so that all your wishes and directives are followed before, during and after the cremation.

Private Family Gathering

You will say your final goodbyes in a warm and comfortable atmosphere, allowing healing to begin. Everyone in our care is bathed with dignity and dressed in clothing of your choice.

Comfortable Witnessing Suite

Families are offered the opportunity to be present for the cremation to provide peace of mind.

Your Loved One Never Leaves Our Care

Many funeral homes outsource important parts of caring for the deceased. We believe the opposite. We believe we should answer our own telephones, care for the deceased, and operate our own crematory so we can ensure the level of care meets Schoedinger standards.

Your Cremated Loved One

Once cremation is complete, your cremated loved one is secured in a sealed inner liner, labeled with name, date of death, identification number, and Schoedinger Chapel. Once sealed they are placed in the urn selected.

Selected Independent Funeral Homes

We hold ourselves to the Selected Independent Funeral Homes Code of Ethics, the strictest in the country. As an invitation only organization, there is only one Selected Independent Funeral Home in each community and we are the chosen representative for Central Ohio.

The Most Advanced Crematory

We were the first in North America to operate a Facultatieve Crematory, considered the best equipment of its kind. We were not concerned about the cost: just our care and concern for the families who place their trust in us. An advanced computer system controls the entire process to ensure our crematory is more environmentally friendly.

Certified Crematory Director

Our crematory operator has been through an extensive training and certification process.

Returning Your Loved One to You

Realizing that the cremated remains are the remains of your loved one, we schedule a time for you to come to the funeral home and accept your loved one in a proper setting. While using rigorous measures, we only release the cremated remains after proper steps are completed.

Confidence

We are confident of our standards and our Cremation Commitment to Care™. Tour our facility at any time or go to www.schoedinger.com to see our crematory and for more information.
